CLOSED LOOP SUSTAINABLE AMENITIES

FROM PRODUCTION

TO

AFTER USE

Discover how we transform everyday plastic waste into safe, certified guest amenities — diverting waste from Sri Lanka's landfills and oceans while creating meaningful local employment.

Return any of our used plastic amenity products to us, and we'll ensure they're responsibly recycled, keeping waste out of landfills.

Sri Lanka

ESG Supplement

To support your sustainability ESG reporting, we provide recycling certificates.

Sustainably Made. Responsibly Certified.

GP Certified products are manufactured in Sri Lanka using post-consumer plastic waste that would otherwise end up in landfills. Through advanced recycling processes, this recovered material is transformed into high-quality recycled plastic for new consumer products.

Every product is manufactured in accordance with internationally recognized recycling guidelines and undergoes rigorous in-house testing for durability, safety, and performance before being approved for commercial production..

A More Sustainable Alternative to Non-Woven Laundry Bags

Non-Woven Is Still Plastic

Made from virgin polypropylene (PP), non-woven bags may look like fabric, but they are still conventional plastic.

Choose Recycled Instead

Our bags are made from recycled plastic, reducing reliance on virgin materials and helping lower carbon emissions while supporting a circular economy.

Recycled Plastic Laundry Bag

Key Features

Heavy-Duty 250 GSM Construction – Designed for superior durability, strength, and long-lasting performance.

Ergonomic Banana-Cut Handle – Provides guests with a comfortable grip for easy carrying and transport.

Sustainability Branding – Reinforces your property's commitment to recycling while increasing guest awareness of your environmental initiatives.

Save More. Stay Sustainable.

Our recycled plastic bags cost significantly less than non-woven bags, helping you reduce costs while making a sustainable choice.

Rice Husk Toothbrush

Our next-generation **Rice Husk Toothbrush** is crafted from **70% natural rice husk** and now incorporates **30% GP Certified recycled plastic**, completely replacing virgin plastic.

By combining renewable agricultural by-products with locally recycled plastic, this innovative design delivers a **100% sustainable solution** without compromising on quality, durability, or guest experience.
